**Reference: Elevation Certificate
#33 Road 3546, Flora Vista, NM**

Dear Janice:

We are submitting herewith the Elevation Certificate, a Site Plan showing the location of your residence in relationship to the Flood Plain Limits and the Flood Plain Map.

Your residence is located in Zone X, which is outside of any established Flood Plain Limits. The Site Plan shows that the line denoting Zone A and Zone X follows along the east side of the backside of your house, however it does go through your garage. This should not be a problem because typically garages do not have inhabitable areas. Your house has a Finish Floor Elevation of 5,611' and the garage has a Finish Floor Elevation of 5,610'. The crawl space is at elevation 5,609.5' and the bottom of the access elevation is 5,608.12'. This information should assist you in showing that your residence is outside of any established Flood Plain Limits. We trust you will contact our office if additional information is required in this matter.

Very truly yours,

LEGEND

SPECIAL FLOOD HAZARD AREAS (SFHAs) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD
 The 1% annual chance flood (100-year flood, also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE AE
 Base Flood Elevation determined.
 Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevation determined.

ZONE AO
 Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); Elevation determined. For areas of sheet flow flooding, velocities also determined.

ZONE AR
 Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently dismantled. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.

ZONE A99
 Area to be protected from the 99 annual chance flood by a Federal flood protection system under construction; no Base Flood Elevation determined.

ZONE V
 Coastal flood zone with waddy hazard (wave action); no Base Flood Elevation determined.

ZONE VE
 Coastal flood zone with waddy hazard (wave action); Base Flood Elevation determined.

FLOODWAY AREAS IN ZONE AE
 The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS
 Areas of 0.2% annual chance flood areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile and areas protected by levees from the 1% annual chance flood.

OTHER AREAS
 Areas determined to be outside the 0.2% annual chance floodplain.

ZONE B
 Areas in which flood hazards are undetermined, but possible.

OTHER AREAS PROTECTED AREAS (OPAs)
 OPAs are normally located within or adjacent to Special Flood Hazard Areas.

1% annual chance floodplain boundary
0.2% annual chance floodplain boundary

Boundary of Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
